

**ISRAEL JOURNAL
OF ENTOMOLOGY**

VOLUME XIII 1979

THE ENTOMOLOGICAL SOCIETY OF ISRAEL

ISRAEL JOURNAL OF ENTOMOLOGY

Published by the Entomological Society of Israel,
P.O. Box 6, Bet Dagan, 50 200, Israel

EDITORS

- Y. Ben-Dov Agricultural Research Organization,
 The Volcani Center, Bet Dagan
- H. Bytinski-Salz Department of Zoology,
 Tel Aviv University, Tel Aviv
- A.S. Perry Institute for Nature Conservation
 Research, Tel Aviv University,
 Tel Aviv

The drawing on the front page shows the female of *Cestioneva punctata* Kugler
(Tachinidae) a new species described from Israel in this volume
(Drawn by W. Ferguson).

Publication date: 30th March, 1980

TABLE OF CONTENTS

	Page
FURTH, D.G. and J. HALPERIN. - Observations on the phenology and biogeography of <i>Thaumetopoea jordana</i> (Staudinger) (Lepidoptera: Thaumetopoeidae).....	1
FREIDBERG, A. - On the taxonomy and biology of the genus <i>Myopites</i> (Diptera: Tephritidae).....	13
KUGLER, J. - New taxa of Tachinidae (Diptera) with a list of the species from Israel and adjacent territories.....	27
SAINI, M.A. and S.S. DHILLON. - Structural modifications leading to the formation of the hypostomal bridge in order Hymenoptera (Insecta).....	61
MELAMED-MADJAR, V., COHEN, S., CHEN, M., TAM, S., and D. ROSILIO. - Observations on populations of <i>Bemisia tabaci</i> Gennadius (Homoptera: Aleyrodidae) on cotton adjacent to sunflower and potato in Israel.....	71
FURTH, D.G. - Zoogeography and host plants of <i>Longitarsus</i> in Israel, with descriptions of six new species (Coleoptera: Chrysomelidae).....	79
FURTH, D.G. - Wing polymorphism, host plant ecology, and biogeography of <i>Longitarsus</i> in Israel (Coleoptera: Chrysomelidae).....	125

The papers published in this journal are selectively abstracted and indexed in the REVIEW OF APPLIED ENTOMOLOGY, compiled by the Commonwealth Institute of Entomology, London and published by the Commonwealth Agricultural Bureaux.

*The Entomological Society of Israel gratefully acknowledges
the financial support of the*

FRUIT BOARD OF ISRAEL (PRODUCING & MARKETING), TEL AVIV

*and is also grateful for the generous donations
from the following firms:*

DEAD SEA BROMINE COMPANY LTD, BEER-SHEVA

NEOPHARM LTD., TEL AVIV

AGAN, CHEMICAL MANUFACTURERS, ASHDOD

TARSIS, AGRICULTURAL & INDUSTRIAL CHEMICAL CO.LTD, TEL AVIV

LIST OF NEW TAXA DESCRIBED IN ISRAEL JOURNAL OF ENTOMOLOGY

VOL. XIII

<i>Prodermoticus moderatus</i> Kugler n.sp.	44
Tephritidae	
<i>Myopites apicata</i> Freidberg n.sp.	16

NOTES FOR AUTHORS

Israel Journal of Entomology will publish original contributions in all aspects of Entomology. Authors are entirely responsible for statements, whether of fact or opinion.

MANUSCRIPTS

Manuscripts, in English only, are considered on the understanding that their contents should not be published elsewhere. If a preliminary announcement relating to the contents of the paper has already been published, this must be stated.

Papers should be concisely written. The "Style Manual for Biological Journals" contains much useful guidance. Manuscripts must be typed in double spacing, on one side of a page of uniform size. The title of the paper should be informative, but preferably not exceed twenty words. An abstract provided at the beginning of the paper, will indicate the main aspects of the subject but not summarize the results or conclusions. Words which are to be italicized in print, Latinized genus- and species-group names, should be underlined with a single, solid line. More than three categories of subheadings, as well as footnotes to text should be avoided wherever possible.

SPELLING

Spelling and terminology should be consistent throughout. Scientific names should be underlined and followed by the name of the first describer, written out in full except for Linnaeus (L.) and Fabricius (F.). Names of localities in Israel will be given as they are transliterated in the latest issue of "List of settlements, localities and antiquity sites, Survey of Israel, Ministry of Labour".

TABLES

Tables should be kept to a minimum and, unless very short, must be typed on separate sheets; their approximate position being indicated in the manuscript. The same data should not be given both in tables and graphs.

REFERENCES

1. In the text, reference to the literature should conform to the "name-and-date" system, e.g. - Williams (1929); (Bodenheimer 1938); Jones and Smith (1950).
2. When reference is made to taxonomic descriptions, or to quoted passages - the relevant page-number(s) may follow the year, e.g. Brown (1939:25).
3. When three or more authors are responsible for a single article, reference is to be made only to the first, followed by "*et al.*" and the date: Thomson *et al.* (1945) or (Thomson *et al.* 1945).

4. Unpublished references are to be cited as Cohen (personal communication), Cohen (unpublished), Cohen (in preparation) or Cohen (in Press) as applicable. Only the latter category will appear in the list of references, together with the title of the periodical to which it was submitted for publication.
5. The list of references will be given at the end of the article, according to the following forms, with the titles of all periodicals unabbreviated.

Bergman, E.D. 1976. The future of insecticides — a problem of human environment. *Israel Journal of Entomology* 11:5–14.

Wigglesworth, V.B. 1972. The Principles of Insect Physiology. 7th edition. Chapman and Hall, London.

Taylor, L.R. and J.M.P. Palmer. Aerial sampling. *In: Aphid Technology*. Edit. H.F. van Emden. Academic Press, London.

TAXONOMY

1. Authors must comply with the requirements of the International Code of Zoological Nomenclature and with the published Opinions of the International Commission.
2. The following abbreviations should be adopted in the text: *n. gen.* — new genus; *n. sp.* — new species; *n. nom.* — new name, used once to introduce a name replacing a junior homonym; *n. comb.* — new combination of names; *n. syn.* — denotes synonymy established for the first time; *n. stat.* — will be used to indicate a new change in rank of a name; *nomen nudum*, *nomen dubium* are not abbreviated.
3. In treating the taxonomy of a described taxon, the following form is recommended for the beginning of a chapter.

Filippia oleae (Costa, 1832) (Fig. 1)

Coccus oleae Costa, 1832:21; Green, 1863:42.

Lecanium oleae (Costa); Smith, 1892:15; Brown, 1899:20.

Filippia oleae (Costa); Fernald, 1903:13; Hall, 1943:50;

4. New taxa must be distinguished from related taxa.
5. In describing new species, the complete data of the type-series, together with the collection (s) in which it is deposited will be recorded in the original description as follows:

MATERIAL EXAMINED. Holotype ♂, Israel, Jerusalem, *Ficus carica*, 14.V.1956, G. Levi (BMNH). Paratypes, 2 ♀♀, same data as holotype, (USNM); 8 ♀♀, Tel Aviv, *Acacia* sp., G. Brown (ZTV).

6. Records of described species will be listed at the end of each relevant chapter in the following form:

MATERIAL EXAMINED. Sinai, Dahab, *Phoenix* sp., 13.V.1958, D. Cohen;
Israel, Haifa, *Pistacia vera*, 20.II.1967, M. Levi.

REPRINTS

Senior authors are entitled to 30 copies of their paper free of charge. Additional reprints may be ordered at the time the proof is returned.

CORRESPONDENCE

Manuscripts submitted for publication should be addressed to: Editor, Israel Journal of Entomology, P.O. Box 6, Bet Dagan, Israel.

SUBSCRIPTIONS

Members of the Entomological Society of Israel IL. 100. Non-members \$ 10.00 + postage. Correspondence for subscription address to: Secretary, Entomological Society of Israel, P.O. Box 6, Bet Dagan, Israel.
