NOTES FOR AUTHORS

Israel Journal of Entomology, a peer-review journal, will publish original contributions in all aspects of Entomology. Authors are entirely responsible for statements, whether of fact or opinion.

MANUSCRIPTS

Manuscripts, in English only are considered on the understanding that their contents would not be published elsewhere. If a preliminary announcement relating to the contents of the paper has already been published, this must be stated.

Papers should be concisely written. The "Style Manual for Biological Journals" contains much useful guidance. Manuscripts in triplicate must be typed on a regular type writer, doubled spaced, on one side of a page of white quarto paper. The title of the paper should be informative, but preferably not exceed twenty words. An abstract provided at the beginning of the paper, will indicate the main aspects of the subject, to be followed by 5-7 key words. Words which are to be italicized in print, Latinized genus — and species-group names, should be underlined with a single, solid line. No more than three categories of subheadings are allowed; footnotes to text should be kept to a minimum.

SPELLING

Spelling and terminology should be consistent throughout. Scientific names should be underlined and followed by the name of the first describer, written out in full. Names of localities in Israel will be given as they are transliterated in the latest issue of "List of settlements, localities and antiquity sites, Survey of Israel, Ministry of Labour". Regions in Israel and nearby areas should follow the "fauna Palaestina" map (as in Theodor, O. 1975. Fauna Palaestina, Insecta I: Diptera Pupipara. The Israel Academy of Sciences and Humanities, Jerusalem).

TABLES

Tables should be kept to a minimum and must be typed on separate sheets; their approximate position being indicated in the manuscript. The same data should not be given both in tables and graphs.

REFERENCES

1. In the text, reference to the literature should conform to the "name-and-date" system, e.g. — Williams (1929); (Bodenheimer, 1938); Jones and Smith (1950). Unpublished references are to be cited as author followed by either (personal communication), (unpublished) or (in press). Only the latter category will appear in the list of references, together with the title of the periodical to which it was submitted for publication.

2. When reference is made to taxonomic descriptions, or to quoted passages — the relevant page-number(s) should follow the year, e.g. Brown (1939:25).

3. Where three or more authors are concerned, reference is made only to the first, followed by "et al." and the date: Thomson *et al.* (1945).

4. The list of references will be given at the end of the article, according to the following forms, with the titles of all periodicals unabbreviated.
